**1. Restriction to one of the following inventions is required under 35**

**U.S.C. 121:**

- I. Claims 1-10 and 12 drawn to a method and product by process, classified in class 264, subclass 297.2.**
- II. Claim 11, drawn to an apparatus, classified in class 425, subclass 542.**

**The inventions are distinct, each from the other because of the following reasons:**

- 2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be performed by a materially different apparatus of the group II claims. For example, the molding apparatus could be made of a plastic or ceramic mold.**
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their**

**different classification, restriction for examination purposes as indicated is proper.**

**4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.**

**5. A telephone call was made to Mr. Scafetta on February 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.**

**Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).**
